The Role of the Library in the Research Enterprise

Christopher J. Shaffer

Oregon Health & Science University, Portland, OR, USA

Abstract

Libraries have provided services to researchers for many years. Changes in technology and new publishing models provide opportunities for libraries to be more involved in the research enterprise. Within this article, the author reviews traditional

library services, briefly describes the eScience and publishing landscape as it relates to libraries, and explores possible library programs in support of research. Many of the new opportunities require new partnerships, both within the institution and externally.

Introduction

Data collection, management, and analysis technologies are changing the landscape of research. Digital technologies, from sensors

Abstract
The University of Illinois at Urbana-Champaign (UIUC) Library conducted an analysis

Article level metrics

The Journal of eScience Librarianship is experimenting with data from Altmetric, to display article level metrics for each of our articles. The Altmetric score is a measure of the attention an article has received online, including social media mentions, news coverage, and online reference manager counts. Contact JESLIB editors and let us know what you think!

So far Altmetric has seen 48 tweets from 44 accounts with an upper bound of 34,162 combined followers.
